

IN THE CLAIMS

Claims 1-8 (Canceled).

9. (Currently Amended) A circuit device, comprising:
- a dielectric substrate[, the dielectric substrate having a first area and a second area;]
- at least one conductive pattern formed in the dielectric substrate[first area];
- a first earthed conductor formed on a first surface of the dielectric substrate, wherein the first earthed conductor does not cover the entire area of the first surface; and
- a second earthed conductor formed on a second surface of the dielectric substrate, the second surface opposed to the first surface, wherein the first earthed conductor is connected with the second earthed conductor.
- [and
- at least one earthed conductor formed on the surface of the second area, the at least one earthed conductor being formed in a lattice pattern on the surface of the second area wherein the lattice pattern has areas free of the at least one earthed conductor.]

Claims 10-28 (Canceled).
